Please follow these steps to determine your ring size.

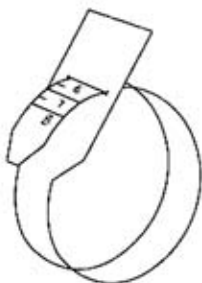

Step 1. Before you print this page using Adobe Acrobat Reader, be sure to deselect the option to "fit to page" or it will change the scale.

Step 2. Cut along the dotted lines above and cut a small slit where the tab will slide into the sizer.

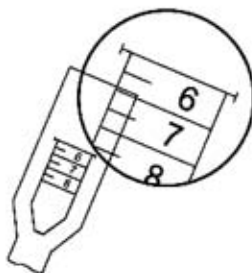

Step 3. Insert the tab into the slit on the sizer and ensure that the numbers are visible.

Step 4. Slide the sizer down the finger to be measured and gently pull the tab through the slit. Do Not pull too tightly or you may get a reading that is inaccurate.

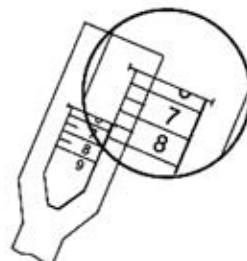

Step 5. Check your ring size by reading the scale on the tab of the sizer. Follow the diagrams as examples.

Proper assembly of the sizer

Ring size show as 6

Ring size shown as 6 1/2
